AMENDMENT AFTER FINAL

ASSISTANT COMMISSIONER OF PATENTS AND TRADEMARKS
WASHINGTON, D.C. 20231

SIR:

In response to the Official Action dated December 31,
1995, please amend the above-identified patent application as
follows:

IN THE SPECIFICATION

Page 5, prenumbered line 2, insert --When the one or more
primitives and subprimitives are grouped, either a polygon or
a wireframe part is generated as the result. If the
definition of the polygon is not planar, it will be grouped as
a sweep polygon automatically. A sweep polygon is defined by
two sets of lines and arcs, each element in one set is
parallel to a mirror image element in the other set, and the
sets are connected by a single edge describing the thickness.
Sweeps may also be created implicitly, as part of a thickened
polygon.
